PROFILES SUMMARY

With more than 10 years hands-on web development experiences, dealing with various business scenarios and problem solving, now I am a results-driven professional with high level proficiency in ASP.NET, data management and mid-level in front-end engineering. Verifiable accomplishment in the full development lifecycle from needs assessment through to implementation and support. I believe, team spirit and customer focused eyes and passion for work and most importantly “can-do” attitude lead me to success.

OBJECTIVES

My career have been mostly involved in back-end development and data management but In this dynamic and evolving front-end development environment, I am seeking and challenging a junior front-end position in your company. Various web experiences and front-end knowledge will be used for your valuable clients.

WHAT I HAVE TO OFFER

I have held responsible positions in a number of companies specializing in IT services as a software programmer. My practical experiences include, customer needs assessment through to development and support, testing, specifications.

WHAT I AM LOOKING FOR

1. Company with a positive ethical stance.
2. Time and opportunity to learn and apply emerging technologies.

CORE SKILLS

- **Platforms:** MS Windows Server up to 2016
- **Server-side:** C# ASP.NET Core, ASP.NET FRAMEWORK 4+, web API
- **Client-side Languages:** React, Redux, HTML5, CSS3, JavaScript, jQuery, Google Material UI Design Principles, SASS
